

PARTNER PROGRAMME

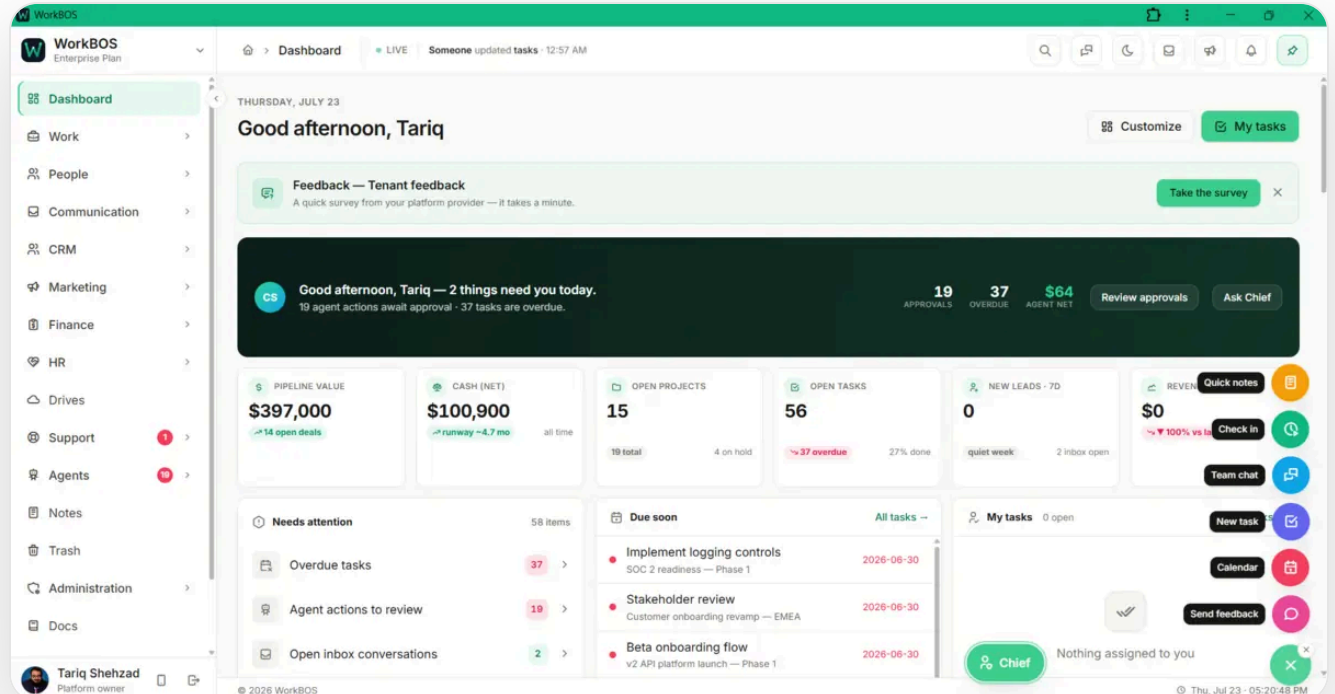

**Earn 30% recommending
the back office your clients need.**

For freelancers, virtual assistants and agencies who work with small businesses in the US, UK and beyond.

WHAT WORKBOS IS

One workspace instead of ten apps.

- CRM, leads and sales pipeline
- Projects, tasks and time
- Invoicing, payments and accounting
- HR, leave and payroll
- Business phone, texts and client portal
- Chief, an AI assistant that asks before it acts

WHY YOUR CLIENTS NEED IT

Small businesses pay for chaos.

- **Too many subscriptions.** A CRM, an invoicing app, a project tool, a phone line, a portal: each billed separately.
- **Nothing talks to anything.** Leads, jobs and money live in different places, so owners can't see where they stand.
- **Hours lost to admin.** Chasing invoices and copying data between apps instead of serving customers.
- **One login, one bill.** Everything connected, from first enquiry to paid invoice.
- **A clear picture.** Cash, pipeline and overdue work on one screen.
- **Work done for them.** Chief drafts follow-ups, invoices and reports, and the owner approves.
